

Description:

High quality mineral base oils and additives produced by qualified performance-enhancing, high-fiber, water-resistant and calcium grease is suitable for multi-purpose use.

Application:

Load is not heavy, the temperature is not high ($<80^{\circ}\text{C}$) and is used in environments where water is unavoidable. Flat and rotary bearings are used in low speed. Chassis, wheel bearings, axle joints are used in lubrication.

Performance Features and Benefits:

- Excellent resistant against to be washed by sticking to metal very well in moist and aqueous surroundings.
- Medium degree resistant to mechanical impacts.
- Excellent protection to adhesive wearing and corrosion.
- Easy usage and economic.
- It can be pumped easily.

Typical Characteristics:

Physical Properties	Green Grease	Green Grease	Green Grease
NLGI NO	1	2	3
Color	Green	Green	Green
Soap Type	Ca	Ca	Ca
Penetration (25°C/60Storke)	310-340	265-295	220-250
Dropping Point, °C, min.	100	100	105
Working Temperature, °C, max.	80	80	80

*Typical data values do not constitute a specification but are an indication based on current production and can be affected by allowable production tolerances. The right to make modifications is reserved.

Health, Safety and Handling:

Based on current available information, this product is not expected to produce adverse effects on health when used for the intended application.
